Summary

Front-end developer with more than 5 years of experience working with: **CSS, HTML, JavaScript, JSON, Django** and other libs. I was hired for my first job while I was still in College and didn't have any experience in the field. It was in this job that I started working with **Web Design** and my main duties were developing websites and dealing directly with customer requirements. After just one year, I was hired by another company to work as a **Front-End Developer**, where I continued to learn and improve my professional skills.

I'm always looking to learn more and I like to keep myself active with challenges and new goals. I have good communication skills, I'm a perfectionist, I always deliver my demands on time, I'm good at solving problems and I know how to work well in a team or by myself.

Professional Summary

2017 - Present

Convertize - Ribeirão Preto, SP

Front-End Developer

Developed, maintained and updated E-Commerce platforms. I mastered in HTML, CSS, JavaScript, Django and JSON language. I dealt with customers directly, both via chats and over the phone, providing support whenever necessary. I was also in charge of mentoring the company's new employees, teaching them more about Front-End and helping with any queries. I've worked with Brazilian clients like: New Nutrition, Drogal, Farmácia Rosário, Super Pague Menos, Nativo Exclusive and Lojas Edmil.

2016 - 2017

Grupo Irmãos - Ribeirão Preto, SP

Web Desiner

I was hired to work as a Computer Technician, where I had to take care of the maintenance and proper functioning of computers and notebooks. I was promoted to assume the position of Web Designer after only 6 months. From there, I started to develop and update the company's website, clients websites and create their visual identity.
